processings executed by said plurality of processors are asynchronously executed
and said plurality of processors share said memory.

132

11. (Twice Amended) A data processing system, comprising:
a plurality of processing means for executing a series of processings of different
types on data to be processed, in a prescribed order; and
memory means for storing said data to be processed in association with state
information to represent the processing to be next performed, wherein
processings executed by said plurality of processing means are executed
asynchronously, and said plurality of processing means share said memory means.
